

Managing Semen Inventories

- Access your semen inventory by clicking **Herd Management>Breeding>Semen Inv.**
- Click **Add New Bull** a screen will pop-up with a list of breeding age bulls in your herd inventory or enter the registration number if you do not own the bull.
- Enter the Cane Code, Tank, Canister and number of straws
- Once the desired information is added click **Save Inventory** and the semen will now be displayed in your semen inventory.
- There are several management features available under the bull name once semen has been added to the inventory.
 - Select edit/adjust to change the number of straws or location of semen.
 - If the semen has been sold to another ASA member select **Record Sale** to keep your inventory up to date. Recording the sale will also add the sold semen to the buyer's semen inventory.
 - Record AI Services to your cow herd by selecting **Record Use**. Enter the cow's registration number and the service date. This will automatically subtract a straw from the inventory for each service recorded.
 - To offer semen for sale select **Private Treaty**. Include any footnotes or information and click **Update**. Select **Generate Listing** or **Generate Catalog** to post the semen for sale in the marketplace.

Managing Embryo Inventories

- Access your embryo inventory by clicking **Herd Management>Breeding>Embryo Inv.**
- Click **Add New Embryo** a screen will pop-up with boxes to add the sire and dam registration numbers along with the flush date.
- Click **Find These**
- A separate window will pop-up to fill in information for cane code, quantity, flush date, tank and canister. At minimum a quantity and flush date must be filled in and then click **Save Inventory**.
- There are several management features available under embryo inventory listing once embryos have been added to the inventory.
 - Select edit/adjust to change the number of embryos or location.
 - If the embryos have been sold to another ASA member select **Record Sale** to keep your inventory up to date. Recording the sale will also add the sold embryos to the buyer's embryo inventory.
 - Record embryo transfers by selecting **Record Use**. In the pop-up window enter the recipient information or registration number if she is recorded with the ASA and the implantation date and click **Save Breeding Usage**.
 - To offer embryos for sale select **Private Treaty**. Include any footnotes or information and click **Update**. Select **Generate Listing** or **Generate Catalog** to post the embryos for sale in the marketplace.
