

Designating a Bull Non-Certificate

As of July 1, 2015 members have had the option to designate AI Sires as Non-Certificate AI Bulls. Designating a bull as non-certificate means that an AI certificate will not be required to register the resulting AI calf. All AI Sires regardless if they are a certificate or non-certificate bull are required to have DNA Markers on file in addition to TH, PHA and DS results. To designate a bull as non-certificate follow the steps below.

- 1) Go to your General Profile by clicking on My Account>View
- 2) Click on the **Herd** tab and select **Breeding Bulls**
- 3) From the list of herd bulls click **View** for the selected bull. This will bring up the animal detail screen for the bull in a new window.
- 4) Once in the Animal Detail screen, click on the **AI Certs** tab.
- 5) To designate the bull as non-certificate click **“Flag This Bull As a Non-Certificate AI Sire”**
 - a. Designating a bull non-certificate is permanent.
